ASHAEL TEK SOLUTIONS

Ashael Tek Solutions specializes in software engineering and enterprise content management. Our team is adept in the latest computing technologies, best practices and engineering principles, including Agile Software Engineering, DevOps, Cloud Computing and User Experience Design.

Past performance includes the successful delivery of visually pleasing, sustainable web applications that enabled automated data processing, analysis and reporting for organizations within the national security agency.

Our support has led to increases of contract scope, the addition of Technical Task Orders, and the distribution of reusable software and apps.
